Measure Notes

- Training activities, such as medical interpreting training and emergency preparedness training, are seasonal – the main recruiting and training seasons are from the early Fall to late Spring, most of which occurs outside the first quarter reporting timeline. For this reason, targets have been seasonally adjusted for “Bilingual Boston healthcare workers who complete medical interpreting training” and “Boston residents completing emergency preparedness-related training.”
- Measures with no FY11 YTD result, as well as no color in the status column, are annual and will have data collected by the end of August.
- In the median response time measures, larger numbers indicate worse performance. The YTD result is an average of monthly data.

The Boston About Results (BAR) Program

Mayor Menino believes that high quality city services are the building blocks for healthy neighborhoods and a successful city. For that reason, the City of Boston is continually developing new strategies that deliver improved services across all City departments at the same or lower cost. A key component of these efforts is Boston About Results (BAR), the City's performance management program.

BAR Performance Reports are management tools used by the Mayor and his senior staff to analyze performance, develop strategies, and track progress toward achieving performance service delivery goals on key performance measures. These reports are used in regular performance meetings with department heads and are also published online in order to increase accountability and transparency both within government and with citizens.

Please visit the Boston About Results website at www.cityofboston.gov/bar to learn more.
